PROFESSIONAL SUMMARY

Software engineer with 6+ years building web and mobile products with React, React Native, Next.js and TypeScript, working increasingly on the backend with Node.js and PostgreSQL. Experience spans customer-facing platforms, the internal admin systems behind them, and AI features shipped into production across e-commerce, fintech and healthcare, plus cross-platform mobile applications shipped to the Google Play Store and TestFlight. Currently working across a UK online pharmacy platform, an AI-assisted accounting SaaS, and a Nigerian B2B retail commerce platform. Experienced delivering production software with distributed teams across the UK, Europe, Asia and Africa. Seeking remote or relocation opportunities in Germany and the wider EU.

SKILLS

Frontend: React, Next.js, TypeScript, Zustand, Redux, TailwindCSS, Shadcn/UI, Mantine UI

Mobile: React Native, Expo, iOS (TestFlight, Xcode), Android Studio

Backend: Node.js, NestJS, Express, PostgreSQL, MongoDB, Redis, BullMQ

Cloud & DevOps: AWS (EC2, ElastiCache, S3), Docker, CI/CD, Vercel, Git

Realtime & AI: WebSockets, Server-Sent Events (SSE), LLM / agentic AI integration, LangChain

Languages: English (Fluent)

PROFESSIONAL EXPERIENCE

Software Engineer — Candour IT Sep 2025 – Present · Contract, Remote (UK)

Product: Medicinex — UK online pharmacy · medicinex.co.uk

- Joined as Frontend Engineer and took on full-stack responsibility in March 2026, covering backend API and system-integration work on a production UK healthcare e-commerce platform.
- Build and maintain the customer storefront and the internal admin platform using Next.js, TypeScript, TailwindCSS, Shadcn/UI and Node.js APIs, including payment, product, prescription and order integrations.
- Integrated an agentic AI shopping assistant enabling users to search treatments, manage cart contents, ask company and pharmacy questions, and complete checkout entirely within the chat interface.
- Built compliance-critical admin workflows for prescriber approvals, clinical questionnaire review, Yoti identity verification, prescription uploads and video consultation bookings.
- Built the business analytics dashboard reporting revenue, orders, conversion, repeat purchase rate, top products and stock levels across configurable date ranges, alongside catalogue, inventory, discounts and cart recovery tooling.
- Built content management tooling covering blog posts, banners, FAQs, legal pages, email templates and broadcast email to newsletter subscribers, with audit logging across admin actions.
- Collaborate daily with UK-based stakeholders, designers and engineers as part of a distributed international team.

Frontend Engineer — Gopaddi (Voyatek Group) Sep 2025 – Present · Full-time, Lagos, Nigeria

Products: Gopaddi travel and payments platform (gopaddi.com), Gopaddi Books accounting SaaS (books.gopaddi.com), and GoPaddi Supplier Host (supplier.gopaddi.com). Joined via Voyatek Group.

- Gopaddi Books** — built the frontend of an AI-assisted accounting SaaS covering the chart of accounts, sales, invoicing and reporting.
- Built its client-side validation layer for document upload: detecting duplicate entries within a file, automatically matching uploaded column headings to the expected schema, and handling empty files, alongside surfacing server-side checks against existing records.
- Built the interface for an AI assistant over the user's accounting data, consuming a server-sent events (SSE) stream for token-by-token responses.
- Supplier Host** — built the frontend of a multi-vertical supplier dashboard covering hotels, restaurants, nightlife, shortlets and workspaces, with inventory, bookings, wallet and settings management, using React, Vite, TypeScript and TailwindCSS.
- Shipped the vacation rental (shortlet) vertical to production end to end.
- Travel platform** — built the chat feature, and maintain the frontend architecture, translating Figma designs into responsive TailwindCSS and Shadcn/UI interfaces and integrating live REST data flows.
- Improved load performance through code-splitting, lazy loading and image optimization within an Agile, CI/CD-driven process, and built the platform's HTML email templates to match exact brand styling across email clients.

Frontend Engineer — Oda Nigeria (Great Brands Nigeria Ltd) Dec 2025 – Present · Contract, Lagos, Nigeria

Product: Oda — B2B retail commerce platform · oda.com.ng. Engaged through MAON Services.

- Build and maintain Oda Admin, the internal platform managing merchants, sales representatives, field operations, products, inventory and order workflows across a nationwide retail network.
- Designed and led the end-to-end implementation of a role-based access control (RBAC) system across the entire admin platform, enabling scoped, permission-based access for sales, operations and management teams.
- Build dashboards and workflow tools supporting merchant ordering, restocking and same-day delivery operations.
- Collaborate with distributed engineering teams across Nigeria, Sri Lanka and the UK using Agile delivery practices.

Software Engineer — PIPN Dec 2025 – May 2026 · Contract, Remote

Product: PIPN — trading community platform · pipn.app

- Built the PIPN mobile application in React Native and Expo; launched on the Google Play Store in March 2026.
- Built the PIPN admin platform for managing users, communities, posts and conversations, escrow and withdrawal approvals, transactions, ads and referrals, with role-based admin permissions and audit logging.
- Worked on the Node.js backend with PostgreSQL, Redis (AWS ElastiCache) and BullMQ for asynchronous job processing, deployed on AWS EC2 with Docker.
- Built core product features: social feed, trade journal, currency-pair tracking with live TradingView charts, community discussions, an in-app marketplace with RevenueCat in-app purchases, real-time chat and Google OAuth.
- Platform reached 4,000+ registered users within months of launch.

Frontend Engineer — AFEX Nigeria Jan 2023 – Aug 2025 · Full-time, Ibadan, Nigeria

Commodities exchange and agricultural technology.

- Built internal platforms used across the business, including an HRMS covering appraisals, leave and organizational surveys with distinct admin, supervisor and staff workflows, and a budget management system handling approval limits and multi-department spend tracking.
- Worked on a unified access control dashboard managing SSO authorizations and staff permissions across AFEX applications.
- Built the reporting dashboard for a commodity grading system, collaborating with ML engineers to surface computer-vision grading results from the mobile application.
- Built a geospatial analytics platform using Google Maps and Highcharts to visualize farmland productivity and geographical distribution.

Frontend Developer, Internship — AFEX Nigeria Jun 2022 – Dec 2022 · Ipokia, Ogun State, Nigeria

- Built internal web tools with React and Mantine UI alongside the engineering team.

ADDITIONAL EXPERIENCE

Freelance Software Engineer — Self-employed May 2023 – Sep 2025 · Remote

Contract and freelance engineering for clients across Nigeria, India, the UAE and the UK.

- Ghoolf Lab FZCO (Dubai, UAE) — React Native app for a multi-club golf competition platform, including OAuth authentication, video capture and upload with AWS S3, and a TestFlight beta release.
- KPA Tech — Telegram mini apps including Tonk, Xmeme, Rial, Surdatrics, BPay, Afriq and Tonnie Coin, writing much of the NestJS and MongoDB backend independently, including BullMQ and scheduled jobs for reward distribution and transaction processing.
- Genx Technologies — frontend for YCIYC, a TON blockchain token launch platform delivered through a Telegram bot, including a token detail view with real-time price data, candlestick charts, swap history and holder breakdown.
- ARC & K FUSION — full-stack e-commerce site for luxury watches, built end to end with a NestJS and MongoDB backend and a React and Next.js frontend.
- BrandGeko — frontend development across products in active build, including a health-tech platform, a social application and an event management tool, using React, Next.js and TypeScript.

EARLIER EXPERIENCE

Account Executive — Multipro Consumer Products Ltd

Jan 2022 – May 2022 · Full-time, Ogun State, Nigeria

INTERNATIONAL COLLABORATION

Delivered production software in distributed teams across the United Kingdom, Sri Lanka, India, the United Arab Emirates and Nigeria, through Agile processes, code review and CI/CD workflows.

EDUCATION

B.Sc. Agricultural Economics and Extension Services — Ekiti State University
